ELECTRONICS INTERNSHIP
REF. NO. 238

About us

This is a rare opportunity to work with a leading designer and manufacturer of advanced camera robotics and virtual technologies for the high-end film and broadcast industry. We ship to broadcasters in 50+ countries to a customer base including BBC, Fox, CNN, ESPN and Sky. Our remote heads and robotics are used on many Hollywood blockbusters including Life of Pi, Birdman, Shape of Water, Tron, Source Code and Adjustment Bureau. We have also delivered boundary-pushing technology projects in close collaboration with clients like Red Bull Air Race and the film Gravity. We pride ourselves on having endless creativity, a “can do” attitude and a friendly family feel to the company. We’re looking for people who want to make a difference and have a hardworking and collaborative attitude.

Tasks

The Electronics Intern will work in close collaboration with the R&D department and assist with expert knowledge on PCB designs/layouts, prepare designs for manufacture and help integrate the designs into new and existing systems. Your work with hardware and software designers to ensure safety and compliance standards are met as well as ensure product functionality and stability. It is important to us that we both profit from this internship. Therefore, we offer a self-contained project and a challenge, combining your passion with an exciting project.

Skills needed

- PCB CAM experience
- PCB design (Altium)
- Understanding of all stages of the development of a decentralised robotic network
- Experience with ARN processor
- Ability to work well as part of a team
- Meticulous attention to detail and accuracy
- Ability to cope with a diverse and rapidly changing workflow

Period

6 months
